I. About Civil Aviation University of China (CAUC)

- ✈ Under the direct administration of Civil Aviation Administration of China
- ✈ With the most complete disciplines on civil aviation
- ✈ Alumni:
 - **12%** of China's civil aviation industry
 - **20%** of senior management personnel
 - **50%** of ATC personnel
 - **30%** of maintenance personnel

II. About CAUC

In today's rapidly and disruptively changing air transport environment (e.g., the impact of COVID-19 and climate change), the aviation personnel require access to advanced and comprehensive knowledge of operation, safety and risk management, economics and finance, and environmental protection, to promote the sustainable development of the global aviation industry through improving the operational efficiency and safety of the whole air transport system.

The two-year master program, responding to the main goals of No Country Left Behind (NCLB) initiative, is designed for students with a university degree and relevant experience in the air transport industry. It covers a wide area of expertise related to air transport, while enabling students to enhance the professional knowledge in relevant disciplines and gain competitive advantages in the aviation industry. With systematic learning, students will gain the skills required for a successful career in various sectors of the air transport industry, including airlines, airport companies and authorities, civil aviation departments and air transport consultancies.

The program includes 14 modules of 1 to 2 weeks each, and tutored visits to airports and airlines with experts from the industry in the 1st or 2nd semester, as well as a professional thesis module in the 3rd and 4th semesters.

1st & 2nd Semester

- ✈ Air Transport Economics
- ✈ Airline Strategy and Business Management
- ✈ Airport Design and Planning
- ✈ Airport Operation Management
- ✈ Airport Strategy and Business Management
- ✈ Aviation Safety & Security Management
- ✈ Aviation Risk Assessment Methods
- ✈ Environment and Sustainable Development of Air Transport
- ✈ Introduction to Aviation Logistics
- ✈ ATM Systems & Aerospace Planning
- ✈ Capacity Analysis of Aviation System
- ✈ Multi-Objective Programming
- ✈ Aviation and Social Science Lectures
- ✈ Off-Campus Industry Practice

3rd & 4th Semester

Students are required to carry out a professional thesis under the supervision of a CAUC professor and an industry tutor, either on campus or abroad, based on a topic related to the fields of Airport Management, Aviation Safety and Security, Aviation Operation or Business Management etc., depending on students' personal expertise and interests.
